### Accessibility

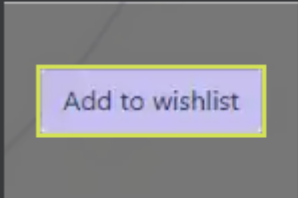

These checks highlight opportunities to [improve the accessibility of your web app](#). Automatic detection can only detect a subset of issues and does not guarantee the accessibility of your web app, so [manual testing](#) is also encouraged.

#### NAMES AND LABELS

▲ Elements with visible text labels do not have matching accessible names. ^

Visible text labels that do not match the accessible name can result in a confusing experience for screen reader users. [Learn more about accessible names](#).

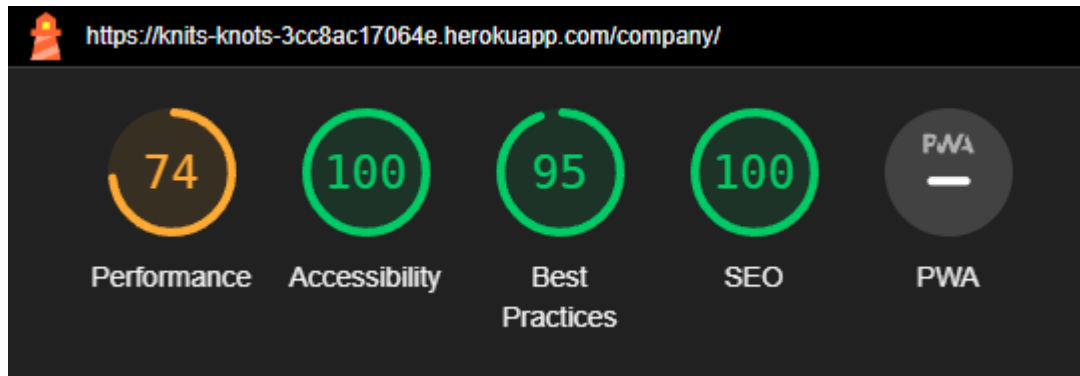

**Failing Elements**

Element
 <code>a.m1-3.btn.btn-wishlist</code>

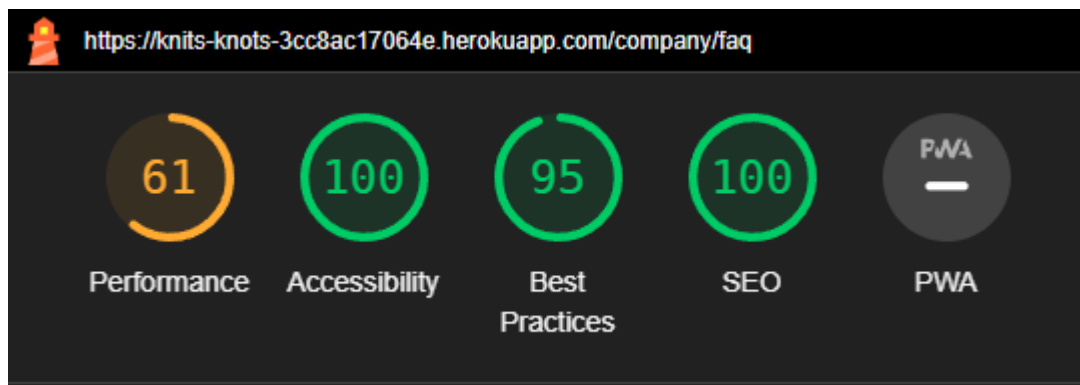

This button has an aria-label:

```
<a class="m1-3 btn btn-wishlist" href="{% url 'add_to_wishlist' product.id %}" aria-label="Add product to wishlist">  
  <span>Add to wishlist</span>  
</a>
```

### ARIA

**▲ [aria-hidden="true"] elements contain focusable descendants**

Focusable descendants within an [aria-hidden="true"] element prevent those interactive elements from being available to users of assistive technologies like screen readers. [Learn how aria-hidden affects focusable elements](#).

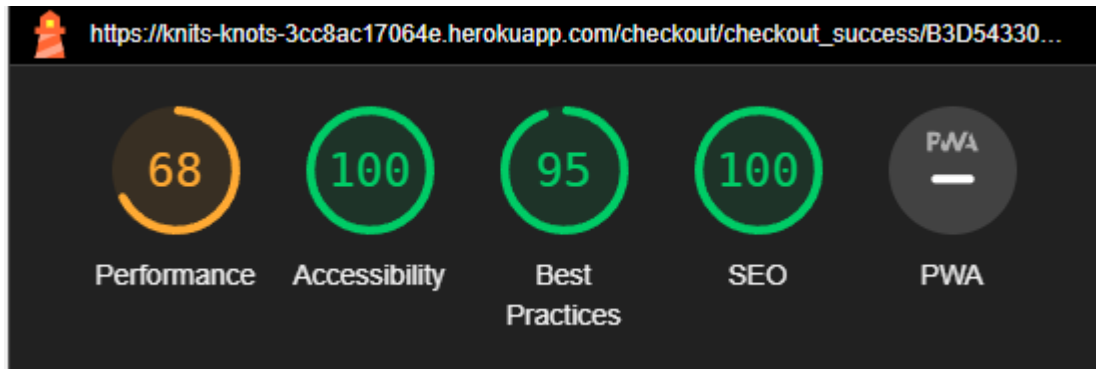

**Failing Elements**

`input.__PrivateStripeElement-input`

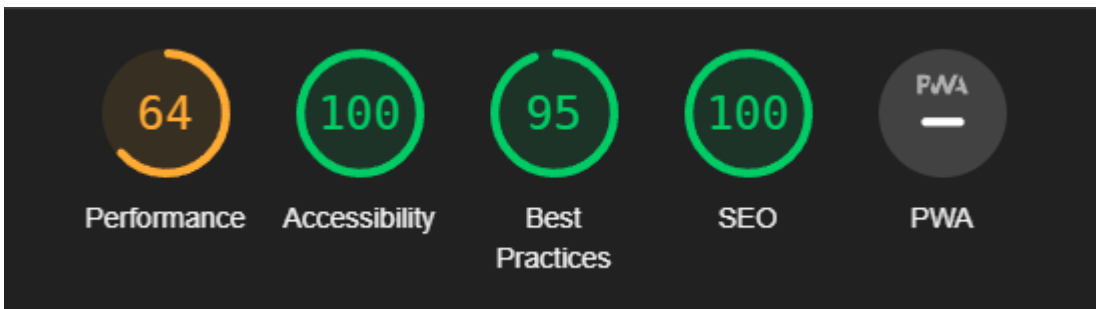

The failing element is a screenshot of a Stripe payment form. The form has a title "Payment" and a subtitle "To add a new payment method, click here." Below the subtitle is a "Payment method" label and a "Card payment" button. The "Card payment" button is highlighted in yellow, indicating it is the failing element. The button text is "Card payment" and it has a "Learn more" link.

Uneditable payment input from Stripe.
